

Hepatitis C...

Isn't that the one
I have been
vaccinated for?

NO

1 in 50 Americans have HCV ~ 2 out of 3 do not know it

There is NO vaccine for hepatitis C!

Are you at risk?

Have you:

- received blood, blood products, or an organ transplant prior to 1992?
- ever shared drug paraphernalia?
- ever been stuck by a used blood needle?
- been on kidney dialysis?
- had a tattoo or body piercing?
- had sexual activity that involves contact with blood?
- shared personal care items (razors, toothbrushes, etc.) with other people?
- ever been incarcerated or a combat veteran?

If you answered **YES** to any of these questions, you may have been exposed to the **hepatitis C** virus. **Get tested!**
